Professional Summary

Computer Science undergraduate at FAST NUCES with strong foundations in Artificial Intelligence, Machine Learning, and software development, along with growing expertise in Cloud Computing. Experienced in building scalable, data-driven systems using Python and modern tools. Seeking a Cloud Computing Internship to apply and expand skills in cloud platforms and distributed systems.

Education

FAST National University of Computer and Emerging Sciences
B.Sc. Computer Science

2023 – Present
GPA: 3.28 / 4.0

Relevant Coursework: Artificial Intelligence, Deep Learning, Data Structures, Algorithms, Operating Systems, Database Systems, Linear Algebra, Probability & Statistics

Technical Skills

Programming: Python, C++, JavaScript

Cloud & DevOps: Google Colab, Google Drive (cloud storage), Docker (basic)

Web Development: React.js, Node.js, Express.js, REST APIs

ML/AI: Pandas, NumPy, scikit-learn, TensorFlow, Keras

Tools: Git, Linux/Unix, VS Code, Jupyter Notebook

Projects

UEBA Deep Learning Project

- Developed a scalable User and Entity Behavior Analytics (UEBA) system using deep learning techniques
- Processed large-scale log data using cloud-based environments (Google Colab)
- Engineered behavioral features and trained anomaly detection models (Isolation Forest, LSTM)
- Designed system to detect insider threats and abnormal user activity patterns

AI Data Chat System

- Built a Python-based conversational interface for querying structured datasets
- Integrated Pandas for real-time data processing and analytics
- Enabled non-technical users to interact with data through natural language

Deep Learning Image Classifier

- Built a CNN achieving 95% accuracy on image classification tasks
- Applied dropout and batch normalization to reduce overfitting
- Implemented using TensorFlow/Keras with custom training pipelines

Cloud-Based Data Processing Pipeline

- Built a data processing workflow using Python on Google Colab
- Utilized cloud storage (Google Drive) for dataset handling and outputs
- Simulated scalable data processing for large datasets

MERN Stack E-Commerce Application

- Developed full-stack application using MongoDB, Express.js, React.js, Node.js
- Implemented REST APIs, authentication, and role-based access control
- Designed responsive UI with dynamic product management features

Experience

Data Management Intern

Wasayal Talent

Jun 2024 – Aug 2024

- Managed and maintained structured datasets ensuring data accuracy and consistency
- Performed data cleaning, preprocessing, and validation
- Supported operational workflows through efficient data handling and reporting

Certifications

AWS Cloud Practitioner (In Progress)
