SUMMARY

AI/ML-focused Computer Science student at FAST National University with experience in Python, deep learning, NLP, LSTM sequence modeling, anomaly detection, and full-stack web development. Seeking an AI/ML or Technology & Product internship where I can build practical machine learning systems and intelligent applications.

EDUCATION

FAST National University of Computer and Emerging Sciences | Karachi, Pakistan

B.Sc. Computer Science | GPA: 3.28 / 4.0 | 2023 - Present

Relevant Coursework: Artificial Intelligence, Deep Learning, Natural Language Processing, Data Structures & Algorithms, Database Systems, Operating Systems, Linear Algebra, Probability & Statistics

Aga Khan Higher Secondary School | Intermediate, Pre-Engineering | 86.6% | 2021 - 2023

Habib Public School | O-Levels | 82% | 2021

SKILLS

Languages: Python, C++, JavaScript

Machine Learning / AI: TensorFlow, Keras, PyTorch, scikit-learn, Hugging Face, CNNs, RNNs, LSTMs, Transformers, BERT, LLMs, NLP, anomaly detection, UEBA, sequence modeling, feature engineering

Data: Pandas, NumPy, Matplotlib, Seaborn, exploratory data analysis, data preprocessing

Web / Backend: React.js, Node.js, Express.js, MongoDB, REST APIs, HTML, CSS

Tools: Git, Docker, Jupyter Notebook, Google Colab, Linux, VS Code

PROJECTS

UEBA Anomaly Detection System | Python, TensorFlow, Keras, Pandas

- Built a deep learning pipeline to detect anomalous user behavior from raw event log data.
- Trained LSTM-based sequence models on engineered log features for behavior-based threat detection.
- Focused on minimizing false positives, a key challenge in user and entity behavior analytics.

AI Data Chat System | Python, NLP, Pandas

- Built a natural language interface that lets users query CSV datasets in plain English.
- Wrote a custom intent parser that maps user questions to Pandas operations without external NLP APIs.
- Designed the tool for non-technical users who need fast data answers without writing code.

Deep Learning Image Classifier | Python, TensorFlow, Keras, CNNs

- Trained a CNN from scratch on a multi-class image dataset, reaching 95% test accuracy.
- Reduced overfitting with dropout and batch normalization after analyzing early model results.
- Built the training loop, evaluation workflow, and confusion matrix analysis manually.

MERN Stack E-Commerce App | MongoDB, Express.js, React.js, Node.js

- Built a full-stack app with product listings, cart, order flow, JWT authentication, and role-based access.

EXPERIENCE

Independent AI/ML Researcher | Jan 2025 - Present

- Researched UEBA, sequence modeling, and deep learning-based anomaly detection.
- Reproduced baseline approaches from research papers and tracked model performance across experiments.
- Maintained experiment logs and summarized findings to guide future model improvements.

Freelance Web Developer | Jun 2024 - Present

- Built and shipped MERN stack web apps for small businesses from requirements through deployment.
- Managed client communication, implementation, and iteration for projects still in active use.
